PURPOSE OF THE SURVEY AND WHO SHOULD RESPOND

The primary purpose of the Institutional Characteristics (IC) component of IPEDS is to collect the basic data that identify and describe the universe of postsecondary education institutions in the United States and its outlying areas. Each institution or branch campus should file a separate report so that they can be listed in the Directory of Postsecondary Institutions.

USES OF THE DATA

Survey results will be used in a variety of ways. For example, they will be used as the source file for sample design and selection for the remaining IPEDS surveys and other data collection activities involving postsecondary education institutions. Other uses include generating basic counts of institutions in each State by type, control, and other key institutional characteristics; compiling directories of postsecondary education institutions that will be made available to the general public; and incorporating results into Career Information Delivery Systems throughout the nation. The data are extremely valuable for survey research design, statistical analysis, and general information purposes.

The definitions and instructions for compiling IPEDS data have been designed to minimize comparability problems. However, postsecondary education institutions differ widely among themselves. As a result of these differences, comparisons of data provided by individual institutions may be misleading.
