Section E: Overall Divisional Health and Plans for the Upcoming Year

As noted in last year’s report, the OIRP continues to be productive and contribute to the general decision making processes of the institution with its reports, data dissemination, and other ad-hoc projects. Also, the office looks forward to be more engaged in the College’s efforts to improve its retention and graduation rates. Over the coming year, the OIRP will be preparing reports and analysis to help in that regard. Already in the works is the production of a DSC Retention Fact Book and database. The office still wants to put increased attention to providing relevant data and information for decision making by creating a set of research reports for administrative use. Report templates were submitted to administrative council and there was a consensus on the types of reports that would be required. The office welcomes the help of the new administrative assistant; but with her duties divided between the IR office and the Foundations office, she has been stretched thin relative to her assignments to the IR office – especially in the last year with the Foundation fund raising project. In this respect, the office’s survey administration and reporting requirements continue to grow and this makes for untimely reporting of surveys. On this note, the office would propose the purchase of an automated survey software that would employ a comprehensive web-based and scanner for survey administration, analysis, and reporting. Initial expense would be high but it would pay off in the long-term. Also, the office could use the help of a student worker to ease some of the workload on the administrative assistant. On the whole though, the office functions well and smooth and carries on its duties and responsibilities as expected.

Looking ahead, upcoming plans and projects for the 2006-2007 include:

1. Create a set of research reports for administrative use, which will be defined by senior administrative officers, as a mechanism for decision-making purposes.

2. Assist with reinvigorating the academic program review process.

3. Assist with the design and framework for the College’s SACS Quality Enhancement Plan.

4. Design and implement practical and useable measurement and assessment mechanisms for the RPG Task Force’s major initiatives.

5. Continue with the production of DSC’s Retention Fact Book to aid with fact-based decision making with respect to improving retention and graduation rates.

6. Administer institutional effectiveness surveys for administrative offices.

7. Produce an evaluation plan and report to improve DSC’s retention/graduation programs and services.

8. Update/refine 2006-10 Strategic Plan Report as appropriate, including producing annual reports.

9. Update DSC’s institutional effectiveness program documents and post on website.
