The Birdfeeder’s Mission
The Birdfeeder strives to help every student meet his or her basic needs. Students can visit the Birdfeeder once a week and choose from multiple sections of food and hygiene items.

Spotlight: Campus Garden
Students utilizing the Birdfeeder expressed a need for access to fresh produce. Faculty members from the Science, Technology, and Math department stepped up to make this initiative a priority. Partnering with Student Life, the faculty broke ground on a campus garden and harvested their first produce in July 2019. In September 2019, students volunteered during Day of Service to prepare the garden for fall planting. To improve the soil, we have implemented a four-year crop rotation, programed and soil mix. In October, we will sow spinach, swiss chard, collard greens, and radish. Get involved at one of our work days by emailing birdfeeder@daltonstate.edu

September’s Impact
- 344 visits
- 199 unique users
- 1,934 items distributed
- 1,378 meals provided

Current Needs
Without generous supporters like you, we would not be able to provide this resource or make the impact we do. Thank you. Current needs include: cereal, peanut butter, jelly, razors, and breakfast bars.
