PURPOSE OF THE SURVEY

The National Center for Education Statistics (NCES) collects enrollment data through this component of IPEDS each year in order to update several annual publications including its college enrollment projections, the Digest of Education Statistics, and the Condition of Education. IPEDS fall enrollment by age of student offers insight into the relationship between the changing demographics of college-going cohorts and enrollment in different types of postsecondary institutions. The residence data will enable States to analyze State level college attendance rates, student in-migration or out-migration, and the type of institutions that attract their citizens to other States. The survey is being conducted in compliance with the Center's mission "to collect, analyze, and disseminate statistics and other information related to education in the United States . . ." (P.L. 103-382, National Education Statistics Act of 1994, Sec. 404(a)).

USES OF DATA

Fall enrollment traditionally is used to measure student access to postsecondary education and IPEDS will continue to provide this important statistical series. The Department also uses fall enrollment data in program planning and for setting funding allocation standards for legislatively controlled programs. Other Federal and State agencies use enrollment data in policymaking decisions, economic and financial planning, manpower forecasting, and policy formulation.

CERTIFICATION - I certify that the information given in this report is correct and true to the best of my knowledge and was prepared in accordance with accompanying instructions. Willfully false statements on this report are punishable by law, U.S. Code, Title 18, Section 1001.
