

Regents Engineering Pathway Program

Transfer Programs May Include

- Aerospace
- Biomedical
- Chemical
- Computer
- Civil
- Electrical
- Environmental
- Industrial
- Materials Science
- Mechanical
- Nuclear/Radiologic
- Polymer/Fiber

Any Many More...

Dalton State is an AA/EEO institution

You're used to making smart choices. Make another one!

Dalton State is one of many institutions in the University System of Georgia approved to offer the Regents' Engineering Pathway Program (REPP), formerly the Regents' Engineering Transfer Program (RETP), a program which allows Georgia residents who are interested in engineering careers to complete their first two years of college close to home and then transfer to one of the five REPP programs in the system to earn an engineering degree.

- Dalton State's REPP Students attend the first two years of college close to home
- Dalton State's REPP students spend less for the first two years of college since Dalton State's tuition is one of the lowest in the country
- Dalton State's REPP students who live at home the first two years may benefit from substantial savings on housing
- Dalton State's REPP students have the opportunity to complete course work equivalent and transferable to all five REPP institutions in the University System of Georgia

And

For Admission to REPP, prospective students must have:

- A minimum math SAT of at least 560 or math ACT of at least 25; and a minimum verbal SAT of at least 440 or verbal ACT of at least 18; and a minimum composite (math and verbal) SAT score of at least 1090 or a minimum ACT composite score of at least 24; and
- a minimum high school GPA of 3.0

REPP students may expect to take the following courses during their enrollment at Dalton State: Calculus and Analytic Geometry I, II, and III; Introduction to Linear Algebra; Differential Equations; General Chemistry I and II; Computer Science; and Principles of Physics I and II.

Note: REPP students, like other engineering students, *may* require a total of 4 to 5 1/2 years to complete the engineering degree requirements. This estimate includes course work at Dalton State and course work at one of the five REPP institutions. This estimate also depends on each student's pre-college preparation and other commitments. REPP students must be admitted to an engineering program at one of the five REPP institutions before transferring.

Regents' Engineering
Pathway Program (REPP)
Application

Name _____
First Middle Last

Address _____
Street City State ZIP

Phone _____ Georgia resident _____ Yes _____ No

Email address _____

Major at Dalton State _____

Intended field of engineering at _____

High school attended _____
